Solve
home drainage problems
with **Hancor**
and
DrainTech
Basins, Channels & Grates

Homeowners who suffer the inconvenience and unpleasantness of flooded basements, wet yards or malfunctioning septic systems now have an economical solution for surface water removal by using **DrainTech** basins, channel drains and grates from Hancor.

Manufactured using rigid, lightweight poly-olefins, DrainTech basins and channels are easy to install, long lasting and require little maintenance. For shallow applications, **DrainTech** low profile basins are recommended.

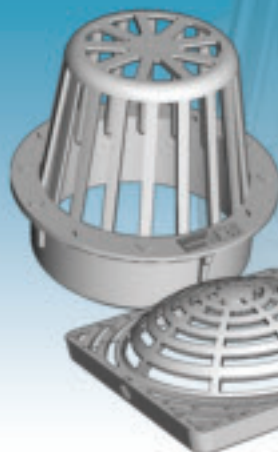

DrainTech structures include a wide range of grates available in two colors for use in turf, landscaping and hard surface areas. Most grates have a non-skid surface and are compliant with the Americans with Disabilities Act.

Through the use of universal adapters, **DrainTech** structures can easily connect to the most common types of pipe used in landscaping and turf applications including corrugated and smooth wall polyethylene pipe, and schedule 40 PVC pipe. The basins are also interchangeable with many competing grates.

The **DrainTech** line of structures also includes valve boxes with risers for use in landscape irrigation systems, and meter pits for easy radio location by utility companies.

For a complete drainage system, Hancor also provides single wall corrugated polyethylene pipe and TripleWall® pipe for downspout and roof to curb connections. A complete line of fittings, including tees, wyes and elbows are also available.

DrainTech basins, channels and grates are instrumental in solving the problems created by surface runoff and poorly drained soils. A properly designed system can improve your property, create a more enjoyable landscape, and protect your investment for years to come.

Window Wells

Quickly and easily drained by using DrainTech Basins and grates, or connected directly to 90° elbow fittings

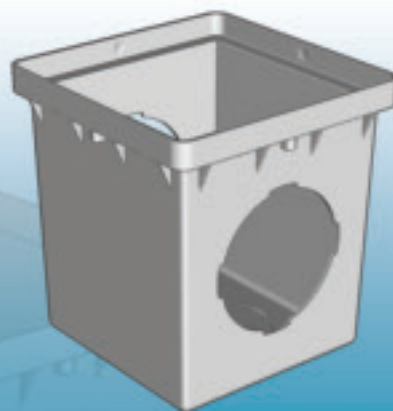

Atrium Grates

Ideal for planter areas, window wells or where a flat grate may clog with leaves or mulch

DrainTech Small Diameter Round Drain Basins

Designed for rapid collection of rain water in smaller lawns and landscape areas

DrainTech Square Drain Basins

Include the most popular designs and grate options along with regular and off-set pipe adapters for large lawn or landscape areas

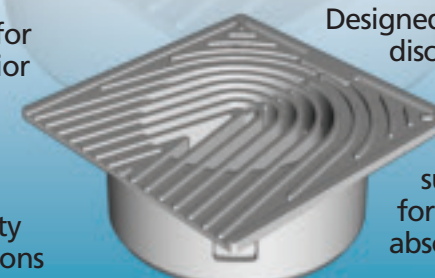

Round or Rectangular Grates

are available in green or black

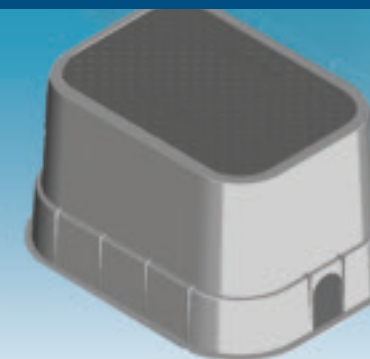

DrainTech Valve Boxes

Designed for the superior strength required for commercial and utility applications

DrainTech Emitters

Designed for efficient discharging of collected water on grassy surface areas for natural absorption

DrainTech Rectangular Valve Boxes

Designed to offer years of service under the most demanding outdoor conditions

DrainTech Channel Drains and Grates

For driveways, pools and patio areas to quickly remove sheet water flows from large flat surface areas

AdvonEDGE Pipe

Provides quick drainage response and is ideal for building foundation and retaining wall drainage

Triplewall/Smoothwall Pipe

With high beam strength to help keep line and grade, both pipes are easily joined with simple, secure integral bell-and-spigot connections. Made from HDPE, both are more impact-resistant than PVC, ABS or styrene

Single Wall Pipe

Economical, easy-to-install pipe easily connects to all basins and drains. Larger diameters can also be used for driveway culverts

Molded Fittings

A complete line of fittings makes installation fast and easy

Downspout Adapters

Connect to pipe systems to carry rainwater from buildings and avoid water seeping down basement walls
